In withdrawing from the Republican
contest for Governor, Dr. Ben
Bruner shows that he is a gentleman
of more anagosity than several of
the Democratic candidates.

The seven midshipmen, who are
defendants in the Annapolis "cribbing"
trials, have been made the
"goats" of the affair, according to
the belief of their classmates.

The trial of M. O. Winfrey, formerly
superintendent of the Middleboro
public schools, on charges preferred
by a young woman, has been
continued until the November term
of the Bell Circuit Court.

An authoritative statement has
been issued at Berlin denying the
story that the man who represented
himself as Dr. Meyer-Gerhard was in
reality Dr. Alfred Meyer, of the
German War Department.

Lieut. Warneford, the young Canadian
who recently destroyed a Zeppelin
over Belgium was killed Thursday
by the fall of his machine in France.
His passenger, Henry Beach Needham,
an American writer, was also killed.

FUNERAL OF CHAS. BASSETT

Body of Young Man Interred
In Riverside Cemetery
Yesterday.

The funeral services of Charles
Thompson Bassett, who died Tuesday
in Austwell, Tex., were held at the
home of Col. E. B. Bassett yesterday
afternoon at 4 o'clock.

Dr. C. M. Thompson, pastor of the
First Baptist church, of which the
young man was a member, conducted
the ceremonies.

The interment took place at Riverside
cemetery in the Thompson lot. Former
classmates who had been closely
connected with him acted as pall bearers.

Charles was an unusually attractive
and popular boy and had many
friends here. He was the oldest
son of Dr. and Mrs. F. H. Bassett,
who lived in this city until last winter,
when they moved to Texas.

NEW CASES ARE TRIED

Circuit Court Has Made Good
Progress on Criminal
Docket.

INJUNCTION CASE MONDAY.

Cayce-Puckett Case Ends In
Fine of \$50 For E. C.
Cayce.

Considerable interest centers in
the argument set for next Monday
of the injunction suit filed by Tandy
& Fairleigh and other tobacco prize
dealers, against the license tax
ordinance passed by the city council
last December and passed again in
April for the fiscal year beginning
May 1. Especial objection is made
in this suit to the fixing of 25c per
hogshead tax on tobacco after it has
been prized. The plaintiffs claim
the ordinance is invalid and inequitable,
and they seek to have it so declared
by the court, and the city officials
enjoined from collecting the taxes
under it.

E. C. Cayce was placed on trial
Wednesday for assaulting S. C. Puckett
with a buggy whip and a verdict was
reached Thursday and defendant
fined \$50.

The court gave peremptory
instruction as to his guilt, the jury
only fixing the amount. Mr. Puckett
while riding a motoreycle collided
with Mr. Cayce's buggy and the
latter got out of his buggy and
struck Mr. Puckett about twenty
times with his whip. Mr. Puckett
made no resistance, but prosecuted
the case and secured the indictment
for assault. There is also talk of a
civil suit for damages.

Luke Ferguson was given a sentence
of one year in the penitentiary for
taking coal from the L. & N's cars.

Bruce Henry was given two years
for forgery.

Houston Griffin, charged with
grand larceny, was acquitted.

Aubrey Mabry, housebreaking,
was given two years.

Dennis Thomas, housebreaking,
continued in Anderson & Co. case
and given 2 years in Blythe's Drug
Store case. Concealed weapon case
continued.

Heber Carden was given one year
for housebreaking, entering Anderson
& Co's. store with Aubrey Mabrey.

Isaac Poindexter, col. given 3
years for assaulting and beating a
negro woman, on plea of guilty.

The case of R. M. Tanks vs. Fidelity
& Casualty Co., was tried yesterday.

WILL IS PROBATED

Mrs. Meda Belle Rives Leaves
Estate to Husband
and Relatives.

The will of Meda Belle Rives has
been admitted to probate in County
Court. The instrument bears date
of April 29, 1914. She bequeathed
all of her property to her brother,
Stanley M. Viser, the income to be
divided and one half to go to her
husband, H. P. Rives. A note of
\$1,000 goes to her husband, also.

Valuable jewelry is left to her sister,
Jane Viser Smith, and after
death it is to be divided between her
nieces, Evelyn Viser Phillips and
Meda Viser. Stanley M. Viser is
named as executor.

Pembroke Man Chosen.

Ross Wood, of Pembroke, was
elected second vice president of the
Kentucky Pharmaceutical Association
at the annual meeting held at
Dawson Springs this week. W. H.
Tibballe, of Somerset, was elected
president.

ORGANIZING FOR BEE LINE

Neighboring Towns Sent Delegations
For Another Conference Here Yesterday.

CROWD MAY GO ON SPECIAL

Meeting Held at H. B. M. A.
Rooms at Three
O'clock.

Another Bee Line Highway meeting
was held yesterday at 3 o'clock
at the request of a number of the
delegates from Pembroke, Trenton,
and Guthrie, who will attend the
Evansville meeting next Thursday.
They arrived in automobiles and came
to discuss the trip to Evansville and
the prospects for a delegation large
enough to justify a special train.
The L. & L. Railroad offers to furnish
a special train if as many as 100
go. Enthusiasm is on the increase
and it looks like fully that many will
go from the towns along the road in
this vicinity.

President Cooper is adding to the
list of Hopkinsville people all who
will let him know that they wish to
attend as delegates. There is no
limit to the delegation. If 50 or
more go, it will be all the better.

SERMON TO THE KNIGHTS

Annual Memorial Services Held
Tomorrow at Methodist
Church.

The annual memorial sermon to
the members of the Evergreen Lodge
No. 38, Knights of Pythias, will be
preached at the Methodist church
Sunday at 10:45 a. m. by Rev. Lewis
Powell, D. D.

The program for the day is as follows:

Doxology.
Invocation.
Hymn 2.
Apostles' Creed.
Prayer—Pastor.
Anthem—Choir.
Responsive Reading, Psalms 19.
Gloria in Excelsis.
Lesson—New Testament, Luke
10:25-37.

Hymn 174
Offerory and Announcements.
Introduction—G. H. Champlin.
Calling roll of dead—Mr. Lucien
H. Davis.

Hymn—When the Roll is Cal'ed.
Prayer—Mr. Alvin H. Clark.
Solo—Mrs. Frank H. Mason.
Sermon—Dr. Lewis Powell.
Male Quartette.
Hymn 55.
Benediction.

"If fraternal love held all men
bound how beautiful this world would
be."

There have been 91 deaths since
the lodge was instituted nearly 40
years ago. During 1915 there have
been five as follows: L. W. Henderson,
T. D. Roberts, S. R. Stewart, O.
D. Thompson and G. B. Underwood.

The membership will assemble at
the Lodge Room at 10:30 o'clock and
go in a body to the church.

Academy of Medicine.

The Academy of Medicine met in
regular session Monday night, with
the following physicians present:
Drs. Bell, Stephens, Held, Lackey,
Rozzell, Rudd, Erkiletian, Harned,
Rice, Grace, Stone, Thomas, Sargent,
Southall and Stroube. "Artificial
feeding," by Dr. Grace, was the subject.
The society meets every Monday
night at 8 o'clock. At the next
meeting Dr. Stone will discuss "Incipient
Tuberculosis." This subject is
of great importance to the profession,
as it is only in the incipient case
that much good may be accomplished.
A large attendance is desired.
J. W. HARNED, Sec.

Over 1,000,000 of the 2,750,000
women in New York are foreign-born.

SHOOTING CONTESTS

Rifle Matches To Be Held On
Earlington Range Sept.
23 to 30.

SEVERAL PRIZES OFFERED.

Members of Company D. Will
Be Strong Bidders For Place
On Rifle Team.

Madisonville, Ky., June 18.—Adj.
Gen. James Tandy Ellis, of Frankfort,
has issued an order fixing Earlington,
September 23 to 30 as the place and
time for holding the state matches
between members of the Kentucky
National Guard.

Two days' preliminary team practice
is allowed, to be followed by the
company team match, the governor's
match, the regimental team match,
and the state team competition.

The company team match is open
to teams of five men each. In this
competition a prize of \$100 in cash is
offered, and to each member of the
winning team a bronze medal will be
given. The second prize is \$75 in
cash, the third \$50, the fourth \$25
and the fifth \$10.

The governor's match is an individual
match opened to all officers and
men of the medical department. The
following prizes are offered in this
contest: First prize, gold medal
valued at \$25 and 60 per cent of the
receipts from entrance fees; second
prize, 25 per cent of the receipts
from entrance fees and third prize,
15 per cent of the receipts from
entrance fees.

The regimental team match is composed
of six officers and men in each
regiment making the highest aggregate
scores in the company team
match and the governor's match. The
prize offered in this competition is
the regimental team trophy, now held
by the Second infantry. The trophy
remains in the possession of the
Colonel of the winning regiment
until the succeeding state competition.

For the purpose of securing a
team to represent the state at the
national rifle matches at Jacksonville,
Fla., in October, the thirty
competitors making the highest aggregate
individual scores in the company team
match, the governor's match and the
scores fired will be retained in the
camp at Earlington at the conclusion
of the regimental team match to contest
for membership on the state team.

The practice period for the state
team will commence immediately after
the team has been selected, and will
continue until October 12. The
"Williams Medal" will be presented to
the member of the state team making
the highest aggregate score in the
national team match. This medal is
presented by Brig.-Gen. Roger D. Williams.

ALLENSVILLE IS ACTIVE

Still Another Bee Line Route
Is Proposed By Other
Business Men.

W. D. Carvell and three other business
men of Allensville motored to this
city Thursday and conferred with
local business men on still another
Bee Line route to Nashville. They
favor a route from here to Elkton,
thence to Allensville, Keokuk and
to a junction with the Russellville
line at Barren Plains, near Springfield,
Tenn. Such a route would need 9
miles of road beyond Elkton to give
it a pike all the way to Springfield.
They learned that Hopkinsville
business men had committed themselves
to the Guthrie route.

A factory in which radium is being
produced has been opened in Scotland
by a Scotland chemist.

HALT ATTACKS ON AMERICANS

Admiral Howard Has Authority
to Land Force in Mexico and
Stop Indians.

YAQUIS THREATEN TROUBLE.

U. S. Marines Ready to Rush
to Aid of Citizens If in
Any Danger.

San Diego, Cal., June 18.—Peril of
American settlers in the Yaqui valley
brought orders Monday for the
dispatch of three cruisers for Mexico
west coast and authorization to
Admiral Thomas E. Howard to land
an expeditionary force if he thinks
best.

The flagship Colorado sailed first,
carrying three companies of marines.
Somewhere off the coast of lower
California the radio began snapping
back orders from the admiral, which
started the protected cruiser Chat-
tanooga for the Colorado. The
protected cruiser Raleigh, also ordered
to sail, began getting up steam
and was expected to get away in
the night.

All three were destined for Tohribay,
near Guaymas, railroad terminus
and seaport in Sonora. Ninety
miles southwest of Guaymas is Es-
peranza, where an American colony
which has successfully resisted at-
tacks of Yaqui Indians, is reported
to be again in danger.

The Indians, who have declared
their independence, seek to oust
settlers from land which is said to
have been taken from the Yaquis,
under the administration of Porfirio
Diaz. They were reported today to
have withdrawn to the mountains.

The three cruisers have available
for landing purposes 1,100 officers
and men besides the marines.

MANDATE AWAITED

In The Reversal of The Case
of Captain E. W.
Clark.

Judge Turner rendered the decision
in the Court of Appeals reversing
the E. W. Clark case.

From a moral standpoint, said
the court, "nothing is to be said in
extenuation of appellant's conduct,
but an indispensable element in his
guilt is that the girl, Alberta Mitchell,
must have been at the time under
16 years of age. We have reluctantly
come to the conclusion, after analysis
of the evidence, that it was not
sufficient on this vital point.

"Numerous instances and occurrences
shown by the record point almost
unerringly to the existence of such
relations between them during the
period named."

The testimony of the girl's mother
as to the time she was born made her
a year younger than the record of
the family Bible and her age as given
to the census enumerator for several
years.

The Court of Appeals was to adjourn
yesterday for the summer and was
expected to issue the mandate in
the case before adjournment. When
the mandate is received here, Capt.
Clark can execute bond and be at
liberty until another trial. The
Mitchell family has moved to Georgia,
except one of the boys.

Co. D. Lost.

"Co. D." lost to Earl Stone's Sensi-
bles at Madisonville Wednesday by
a score of 7 to 0. The Madisonville
bunch are nearly all old professionals
and the team has on it such men as
Artie Cummins, Pacey George Hancock,
"Red" Hodge, Scott Means and
"Shorty" Johnson. "Co. D." showed
that it had some good timber,
that could be developed and it was
largely through of lack practice
that the game was lost.

Wooden block paving is in quite
general use in Norway.

RUSSIANS IN RETREAT

Invasion of Czar's Territory
at New Point Follows Victorious
Advance.

THREE BIG ARMIES CLOSE IN

French Report Ferocious Attacks
and Counter Attacks
Along Front.

London, June 18.—Another twenty-
four hours of fighting in Galicia has
developed nothing to stem the
Austro-German advance toward
Lemberg, and tonight Berlin claims
the Russians are retreating over their
own frontier toward Tarnograd,
four miles from the Galicia border.

This means an invasion of Russian
territory at a new point, but, according
to military observers here, it may
spell ultimate advantage for the
Russians, in that a general Russian
retirement northward into Poland
would divert General Linsingen's attempt
to crush the Russian center near
Zurawna, which would sever the
communications of the Russian army
in southeastern Galicia and Bukovina.
The military writers here say the
real danger zone from the Russian
standpoint is in the Zurawna
district along the Dniester.

According to Berlin, the Austro-
German forces have battered through
Niemerow, thirty miles northwest of
Lemberg, and are advancing toward
Jaworow, which is only twenty-five
miles west of the Galician capital.
Three great masses of Austro-Germans
are thus sweeping from the San
toward the capital, and the prediction
is made that the decisive battle,
if one is fought, will take place
in the vicinity of Crokek, where military
observers believe the Russians
should benefit by the lake country.

British newspapers the 18th not
minimizing the importance of the
Austro-German successes in Galicia,
acclaim what is styled the Grand
Duke Nicholas' defense strategy in
shifting his front from north and south
to northwest and southeast. This
maneuver, it is asserted, has defeated
the Austro-Germans to blow to some
extent, and at the same time denied
them a full test of strength.

Thus the Russian retreat, characterized
in London as strangely parading
the allies' victory on the Marne.
The struggle along the Dniester
and before Lemberg, it is considered
here, must determine which side is
the most astute in the present
maneuvers.

It is officially announced that the
Italian submarine Medusa has been
torpedoed and sunk by an Austrian
submarine, says a dispatch from
Rome to the Stefani agency.

Italian outposts have arrived in
sight of Trieste.

ON THE STUMP

Candidates For Commonwealth's
Attorney Holding Joint
Debates.

Messrs. Jas. B. Allensworth and
Denny P. Smith, have been holding
joint debates every night this week,
except Thursday night. They spoke
at Bainbridge and Sinking Fork
Saturday at Perry's Tuesday night,
Walker's School House Wednesday night
and Honey Grove last night. There
are appointments at Crofton and
Kelly for this afternoon and tonight.

First Presbyterian Church.

The subject for the morning hour
of worship will be, "The Seven Stars
and The Seven Candlestick." The
subjects for the evening service will
be, "Yoke of Wood and Iron." We
extend a cordial invitation to visitors
and strangers to worship with us.
The members of the church are requested
to make every effort to keep the
attendance from falling off during
the hot weather. Let us be faithful
at all the services.

SATURDAY, JUNE 19

A Rotterdam dispatch to the Exchange Telegraph company reports that the damage done at Karlsruhe by the air raid of the French squadron of aeroplanes was much greater than the papers were allowed to state. "Two hundred persons were killed," says the correspondent. "Fifty bombs were dropped, one of them also destroying one of the ducal palaces used as headquarters by the Karlsruhe commandant. Others destroyed a number of factories engaged in manufacturing shells. A great panic was caused and the victims will be buried secretly at night."

Eli Head, twenty-five years old, a negro chauffeur, was taken to the Dawson, Ky., jail Tuesday night and whipped by masked men. Head says there were about twelve men in the crowd. The negro is employed by William Lynch, a banker, and it is alleged that he is reckless in driving the car.

Julius Babey, who shot and instantly killed his young wife, Agnes Babey, at their home in Louisville, April 23, was found guilty of murder in the criminal court. The jury after deliberating thirty-eight minutes, fixed his punishment at death. The defendant pleaded insanity. Babey is 24 years old.

Out of courtesy to Senator Ollie M. James, the president has allowed him to name the postmaster at his home town, Marion, Ky. The president has appointed as postmaster of Marion, Jesse Olive, who was recommended by Senator James.

The Graves Bank of St. Louis county, Graves and Seibert avenue, was robbed of \$5,000 by two men, who tied the cashier, Harry J. Hehme, and his assistant, Oscar C. Creelius, back to back and placed them in the vault.

A further cut of from 10 to 20 cents in the prices of flour was made in New York this week. Good spring patents were quoted at \$6.50 a barrel, that figure being \$1.50 under the high mark of the season.

Scenes From the Millennium.

An elevated station. Train stops to take on usual crowd. Conductor speaks: "Take your time, ladies and gentlemen; there is no hurry, I assure you. If you will allow me, I shall be most happy to find seats for all of you. . . . Take the dog right in, sir, certainly. It has as much right to a place in the car as a human being. . . . Let me hold your baby, madam, while you look after the other children. I have four seats for you right up in front, where it is cool. . . . If you will wait just a second, sir, I will come right back to help you with your baggage. Here is a dollar bill I think you must have dropped, sir. Don't thank me, sir; it is no more than my duty, and I am happy to restore it to you. . . . And now, if you are all settled and comfortable, I will start the train with your permission."—Town Topics.

Just Like a Boy.

The teacher was having an interesting half hour with the children, asking them questions, anyone having the privilege to answer. It was a great time to show off. The teacher asked about various things, and one question was about locusts. Several hands were raised, and finally one boy was selected to speak. "A locust is a bug that gives people tuberculosis," was his answer.

Weather, Man.

"There is no 'thoroughly reliable weather man.' The government 'forecasts' are fairly safe for a certain number of hours, but as for the predictions that include the entire year, or any considerable part of it, they are not worth the paper they are printed on. They may be all right, they may be all wrong. Nobody knows which."

FARM STOCK

KEEP FLIES FROM ANIMALS

Tar Often Can Be Used to Advantage in Protecting Sore Places From Irritating Insects.

(By G. H. GLOVER, Colorado Experiment Station.)

There is probably nothing that will keep flies away from live stock to the extent that they will not be more or less irritated by them.

Most of the coal tar products used for "dips" to kill external parasites are useful when used over the body, well diluted, and applied from a spray pump. Oil of tar or pine tar can often be used to advantage in protecting places that have become sore from the irritation of flies.

The following mixture has usually given as much satisfaction as any other: Synthetic oil of sassafras, four ounces; karo or neat's-foot oil, two pints, and crude petroleum enough to make one gallon. This will cost about \$1 a gallon.

This mixture should not be expensive and will not need to be applied as often as the other: Fish oil, 100 parts; oil of tar, 50 parts, and crude carbolic acid, 1 part.

The best way to "swat the fly" is before he is born. Allowing piles of manure to accumulate in the stables and yards for flies to breed in and then applying some kind of "dope" to keep flies away from the animals is inconsistent, to say the least.

MAKE PROFIT WITH FEEDERS

Animal Should Have Beef Characteristic, a Wide, Strong Back, and Large Heart Girth.

(By JOHN L. TORNEY, Wisconsin Experiment Station.)

Steers, if they are to make profitable gains in the feed lot, must have beef characteristics, a wide, strong back and a large heart girth.

They must have a strong frame and plenty of room for the vital organs, for an animal with a weak constitution cannot hold up through the feeding season.

A wide head and muzzle usually indicates good feeding qualities. Short legs heavy hind quarters and arched ribs are essential in the feeding animal.

The skin should be reasonably thick, soft and covered by a heavy coat of hair.

The animal should have a straight back and low-set appearance, due to the depth of the body and short legs.

During the past, the prices of wool and mutton have had a powerful influence upon the size of the farm sheep flocks. There has always been a tendency for most farmers to dispose of their flocks when prices become low and to enter into the business again when the prices become high. Where purebred sheep are kept the size of the flocks are, as a general rule, much smaller.

The work of earling for the flock should be considered in determining the size. Certain chores must be done, and many of these would take little more time with 50 than with 15 or 25 head. Much of the equipment needed for a smaller flock will serve for a larger one. A ram will be necessary for a dozen ewes, while as a matter of fact a mature one could be bred to 50 ewes fully as well.

As a general rule, under mixed farming conditions, one sheep to three or five acres is considered advisable. The question should not merely be, "How many sheep can you keep?" but "How many can you keep healthy?" A small healthy flock is much preferable to a larger one that is diseased.

Training Young Horses.

When training young horses, it is important to teach them one thing at a time and teach that thoroughly before beginning something else. Nothing should be more gradual than the development of the power of a draft horse or the speed of a trotter.

Stockers Steers on Pasture.

tion cannot hold up through the feeding season.

The Game Is Not for Man Alone.

The intelligence that appears to pervade the organic world and that reaches its conscious expression in the brain of man is just as manifest in all the forms of animals and plants that are inimical to him—in all his natural enemies—venomous snakes and beasts of prey, and insect pests—as in anything else. Nature is as wise and solicitous for rats and mice as for men. In fact, she has endowed many of the lower creatures with physical powers that she has denied him. Evidently man is only one of the cards in her pack, doubtless the highest one, but the game is not played for him alone. —John Burroughs, in North American Review.

China's national hymn is said to be so long that it requires about half a day to sing it.

CAPITALIZATION.

	Authorized	Outstanding
7% Cumulative Preferred Stock.....	\$1,500,000	\$1,500,000
Common Stock.....	2,500,000	1,437,000

Important features regarding the business of this Company and this issue of stock may be summarized briefly as follows:

1. This stock is a legal investment for trust funds in the State of Kentucky.
2. The company has no bonded or mortgage indebtedness.
3. This business was established in 1877 by C. C. Mengel and C. R. Mengel, and incorporated in 1903 as C. C. Mengel & Bro. Co., under the laws of the State of Kentucky, and has been continuously successful during the whole period of 38 years.
4. The business of the Company is the manufacture of Mahogany Lumber and Veneers, and it is the largest importer of Mahogany in the United States: its proportion of the entire importation in 1911 being 18%; 1912, 24%; 1913, 14%; 1914, 16%.
5. The legal proceedings for the issue of the above Preferred Stock have been passed upon by Judge Alex. P. Humphrey, and Archibald B. Young, Esq., of Louisville.

Peculiar Aversions.

Robert Boyle, the philosopher, could never overcome his aversion to the sound of water splashing from a pipe, and he has put on record the case of one of his servants, who could never bear hearing a knife being sharpened or a sheet of brown paper torn without bleeding at the gums.

How to "Break in" Book.

The proper way to "break in" a book is to lay it on its back on a table, and then open but a few leaves at a time, alternately at the front and at the back, until you reach the middle of the volume. Some readers have the bad habit of keeping their place by opening the book until the covers meet, and then laying it down, still open. Limp leather bound volumes will stand such treatment, but those bound in boards will not. Almost as bad is the trick of keeping your place by putting between the leaves some bulky object.

The Secret of a Good Figure

often lies in the brassiere. Hundreds of thousands of women wear the bien-jolie brassiere for the reason that they regard it as necessary to the figure the youthful outline which fashion decrees.

BIEN-JOLIE BRASSIERES

are the daintiest, most serviceable garments imaginable. Only the best of materials are used—for instance, "Woolin", a fabric combining of great durability—absolutely fire, less-permitting laundering without removal.

They come in all styles, and your local Dr. Goods dealer will show them to you on request. If he does not carry them, he can easily get them for you by writing to us. Send for an illustrated booklet showing styles that are in high favor.

THE THRICE-A-WEEK EDITION OF THE NEW YORK WORLD

Practically a Daily at the Price of a Weekly. No other Newspaper in the world gives so much at so low a price.

The year 1914 has been the most extraordinary in the history of modern times. It has witnessed the outbreak of the great European war, a struggle so titanic that it makes all others look small.

You live in momentous times, and you should not miss any of the tremendous events that are occurring. No other newspaper will inform you with the promptness and cheapness of the Thrice-a-Week edition of the New York World. Moreover, a year's subscription to it will take you far into our next Presidential campaign.

The THRICE-A-WEEK WORLD's regular subscription price is only 1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and Hopkinsville Kentuckian together for one year for \$2.65.

The regular subscription price of the two papers is \$3.00.

Send all subscriptions to Kentuckian office.

NOTICE OF DISSOLUTION

Following the death of J. R. Hawkins & Co., the firm of J. R. Hawkins & Co., has entered into dissolution, the junior member of the firm, Ned Turner, having, over the entire business, which will be run at the same old stand and from which it has done business for the past thirty-eight years, and under the same firm name of J. R. Hawkins & Co.

Persons indebted to the old firm are requested to call and make settlement of the same, as the business must be closed at the earliest possible moment.

I cannot let this opportunity pass without expressing in behalf of the firm of J. R. Hawkins & Co., the old and the new, our profound gratitude for the consideration and support accorded us by the public of Hopkinsville, and I am taking the liberty of speaking for ourselves the same liberal consideration in the future, assuring our customers that we shall adhere to the same fair dealing and prompt service that has characterized our conduct of the business for thirty-eight years.

Very respectfully
J. R. HAWKINS & Co.

By Ned Turner.
Hopkinsville, Ky., June 2, 1915.

Cut It Out.

A good theatrical story was told by Jerome K. Jerome at a London club dinner to dramatic authors. "I spoke to an eminent producer not long ago," he said, "about a play a young friend of mine had sent to him. He remembered it. 'Ah, yes,' he said. 'Not at all bad. There's an idea in it.' Later on it was produced, and after the show I went behind. 'Well,' said the eminent producer, 'what did you think of it?' 'Oh, all right,' I said. 'It seems all correct. But what about the idea?' He didn't seem to understand. 'The idea,' I reminded him; 'you said there was an idea in it.' He remembered then. 'Ah, yes,' he said. 'Yes. We had to cut that out.'"

No "Fixed Star."

The phrase "fixed star" is a misnomer. There is no such thing. All the millions of stars one sees in the vault of the sky, and millions, vastly more millions, revealed by telescope and photography, with undoubted uncountable other millions of millions, billions of billions, in the universes of the infinite beyond, have their movements, whether in groups or whether by single suns each, with its retinue of sun and its few known planets.

Plauen, Germany, has a normal population of 106,000.

Wouldn't you give six workers \$3.00 to HOE for you all summer? Watch the wonderful work of our "MULE HOE" WEEDER wilting weeds. You won't want six weary workers, one worker willingly works wonders. For Sale Everywhere.

BANKERS URGED TO GO-OPERATE WITH FARMERS

SOUL MATERIAL HAS ENTERED THE BANK VAULTS OF THE NATION.

The Bank a Financial Power House to the Community.

By Peter Radford.

One of the greatest opportunities in the business life of the nation lies in practical co-operation of the country banks with the farmer in building agriculture and the adventure is laden with greater possibilities than any forward movement now before the American public.

A few bankers have loaned money to farmers at a low rate of interest, and oftentimes without compensation, to buy blooded livestock, build silos, fertilize the land, secure better seed, hold their products for a better market price, etc. The banker in contributing toward improving the grade of livestock, the quality of the seed and the fertility of the soil, plants in the agricultural life of the community a fountain of profit, that, like Tennyson's brook, runs on and on forever. Community Progress & Bank Asset.

The time was when money loaned on such a basis would severely test the ability of the banker; such transactions would pain the directors like a blow in the face. A cashier who would dare to cast bread upon waters that did not return buttered side up in time for annual dividends would have to give way to a more capable man. This does not necessarily mean that the bankers are getting any better or that the milk of human kindness is being imbibed more freely by our financiers. It indicates that the bankers are getting wiser, becoming more able financiers and the banking industry more competent. The vision of the builder is crowding out the spirit of the pawnbroker. A light has been turned on a new world of investment and no usurer ever received as large returns on the investment as these progressive bankers, who made loans to uplift industry. The bankers have always been liberal city builders, but they are now building agriculture.

A Dollar With a Soul.
It is refreshing in this strenuous commercial life to find so many dollar souls. When a dollar is applied to perform a task that does practical good, yield the highest rate of interest, we usually bear the rustle of the eagle's wings as it soars upward; when a dollar, the borrower, return at the option of the Goddess of Liberty for its contract, and in when a dollar is asked to enter into the vaults of our bank and rate, time and volume have a new basis of reckoning in so far as the ability of some of the bankers permit them to co-operate in promoting the business of farming.

God Almighty's Noblemen.
These bankers are God Almighty's noblemen. Heaven lent earth the spirit of these men and the angels will help them roll in place the cornerstones of empires. They are not philanthropists; they are wise bankers. The spirit of the builder has given them a new vision, and wisdom has visited upon them business foresight.

The cackle of the hen, the low of kine and the rustle of growing crops echo in every bank vault in the nation and the shrewd banker knows that he can more effectively increase his deposits by putting blue blood in the veins of livestock; quality in the yield of the soil and value into agricultural products, than by business bankshakes, overdrafts and gaudy gambles.

Taking the community into partnership with the bank, opening up a ledger account with progress, making it and enterprise stockholders and the prosperity of the country an asset to the bank, put behind it stability far more desirable than a letterhead bearing the names of all the distinguished citizens of the community. The bank is the financial power house of the community and blessed is the locality that has an up-to-date banker.

POLITICAL PRAYER MEETINGS

It is a sad day for Christianity when the church bells call for prayer meetings for a political party. Such gatherings mark the high tide of religious political fanaticism, out bitterness into the faces of men; fan the flames of class hatred; and destroy Christian influence in the community. The spirit animating such meetings is anarchistic, un-Christian and dangerous to both church and state.

The success of the nation is in the hands of the farmer.

Work for the best and the best will rise up and reward you.

Tenant farming is just one thing after another without a pay day.

WAR! What Is It All About?

HAS the whole world gone stark mad over a very foolish and trivial question? Are swords rattling, cannon rumbling, mailed armour clashing just because Russia wanted to show her love for the little brother—Serbia?

Tear aside the curtain of Europe's politics and see the grim and sinister game of chess that is being played. See upon what a slim, yet desperate, excuse the sacred lives of millions may be sacrificed. Read the history of the past one hundred years, as written by one of the greatest authorities the world has ever known, and learn the naked shameful truth. Just to get you started as a Review of Reviews subscriber, we make you this extraordinary offer. We will give to you

FREE!

Duruy's History of the World

Four splendid cloth volumes, full of portraits, sketches, maps, diagrams

Today is the climax of a hundred years of preparation. Read in this timely, authoritative, complete, AND THE ONLY CONDENSED classic world history—of which over 2,000,000 copies have been sold in France—hundreds of years. Read in these entrancing pages how Russia has for years craftily been trying to escape from her darkness to get a year-round open port, with its economic freedom. Read how Germany and Austria, fearful of the monster's latent strength, have been trying to checkmate her and how they have pinned all in this last, supreme stake.

The Lesson of the Past

THIS master of the pen shows you the glory that was Greece's and the grandeur that was Rome's. He guides you through the Middle Ages, the picturesque old days of feudalism and the crusades through the Renaissance up to contemporary history, which Prof. Duruy completes in brilliant manner. In the story of the past he is the secrets of today. And you will understand them better when you get the Review of Reviews for a year—the Review of Reviews will give you a same interpretation of the events that are taking place with such rapidity. It is not enough to read the daily news reports. Your ability to comprehend conditions, and to discuss them intelligently depends on a true interpretation of the meaning and the "reason why" of events. In your mind you must bring order out of chaos—and the Review of Reviews will do it for you.

Get the REVIEW OF REVIEWS for a Year

Send the coupon only. It brings the whole set—four volumes—charges prepaid—absolutely free. All we ask is that—after you get the books and like them—you send 25 cents for shipping and \$1.00 a month for three months to pay for the Review of Reviews. If the books aren't worth more than you pay for books and magazine together, send them back at our expense. But be prompt. The world-wide fame of Duruy will make these 5,000 sets disappear from our stock soon at once. Send your coupon today—and be in time.

FARM ANIMALS

PROPER CARE OF BROOD SOW

Animal Is Often Neglected Before and After She Is Bred—Furnish Her With Separate Pen.

The care of the brood sow is too many times neglected before and after she is bred. Many times they are kept in the same lot with the fattening hogs, which is a sad mistake and almost sure to result in a weak bunch of pigs. Good care at this time means much towards a good crop of strong, healthy pigs.

In the first place the sows should have a separate lot from the rest of the hogs, and it should be large enough so they get plenty of exercise. If they do not take plenty of exercise, they should be urged to do so either by driving them daily or by having their sleeping quarters and their feeding place some distance apart.

Another good plan, if a person has his farm fenced hog tight, is to let the sows have the run of the farm. They

Pigs in Clover.

will wander around quite a little if the weather is nice, and pick up a good deal of their living.

Another important part at this time is the feed. Their feed should be of rather a bulky ration. Corn should be fed moderately along with alfalfa hay, some mill feeds, and a small quantity of oil meal or tankage. The sows should be kept gaining slowly from the time they are bred till farrowing time, and care should be taken that the feeds are not too fattening.

A week or so before farrowing time, each sow should be shut by herself and watched closely. Her feed should be reduced a little.

If this plan were followed more closely, the average of the pig crop would be somewhat larger.

SHEEP AND SOIL FERTILITY

Everything Possible Should Be Done to Bring Ewes to Vigorous Condition at Mating Period.

As the country ages and the fertility of its fields becomes exhausted its appreciation of the sheep will increase. Early maturity is an important quality to consider in selecting sheep.

Whether you are keeping sheep for pleasure or profit, your desires will be more fully met if your flock is of superior quality. A strong sheep does not necessarily have to mean a large one; in fact a majority of the strongest sheep are medium in size.

Every sheep owner should keep a purebred ram, but every man is not qualified to keep purebred stock. Everything possible should be done to bring the ewes to a vigorous, flesh forming condition at the mating period. Sheep are excellent farm cleaners, weed killers and fertilizers.

The man who desires large profits from his flock should afford it the best that good management will produce.

BREEDING CRATE FOR SWINE

Stout Frame Made of Two by Four Stuff, Closed in Front and Open Behind, Is Useful Device.

In answer to a query for an illustration and description of a breeding crate for hogs, one is taken from "Swine in America," by Coburn, and is given herewith:

"It is a stout frame made, say, of two by four inch stuff, closed in front

A Breeding Crate.

and open behind, with a bar adjusted to slip behind the sow above the hocks, and a two by four inch strip attached to the forward end of the crate on either side at about where the sow's head comes, and extending to the rear and bottom where it is fastened. These strips are for the sow's forward feet to rest upon and hold her weight off the sow. A very good size for such a crate is five and one-half or six feet in length, two feet four inches in width, and three feet high. Cleats can be nailed crosswise of the crate floor to prevent the sow's slipping. When necessary, in breeding a small boar to a large sow, a raised platform for his hind feet, such as the illustration shows, can be produced."

THE OAK'S MESSAGE

By DONALD ALLEN.

(Copyright, 1915, by the McClure Newspaper Syndicate.)

Miss Irene's Aunt Cynthia lived on and ran a farm. She was a hard worker and a strong-minded woman, and she had married almost without love, and certainly without romance. Her neighbors said she was hard-hearted and a driver, and seemed utterly without pity, but they were mistaken. She had loved her brother John, and when his only child drove up to the gate she took her in her arms and said: "You poor child, you, but you shall have a home with me for life, and I will be a kind mother to you!"

The lapse of time is the remedy for all our griefs. After three months had passed Miss Irene was like her old self again, and there was song and laughter in the house.

A quarter of a mile below Aunt Cynthia's farmhouse, and near the highway, was a giant oak tree. The farmers spoke of it as the old oak tree, and it was a landmark to be seen for miles and miles.

Miss Irene had sat and gazed at that towering tree for an hour at a time, but it had never occurred to her to make a closer acquaintance until one afternoon when she had a reply to indite to the letter of a girl chum. She would do her writing at the foot of the old oak tree.

As the girl drew nearer and nearer to the old oak the more it appealed to her, and when at last she reached it she stood with awe in her heart. More than a hundred years they said, and it had been buffeted by hundreds of gales.

"Chatter! Chatter! Chatter!"

It was a gray squirrel up the trunk a few feet and looking at the girl, defying her to come nearer.

"But I will!" she laughed, as she plunged into the bushes.

The squirrel whisked around to the other side of the tree.

By this time she had reached the trunk and passed around it the squirrel had made his way to the highest limb. The girl found something else, however—something that perhaps not one in a thousand who passed it had knowledge of. At the height of her chin was a cup or hollow that would hold a quart of water. It was a wound that the tree had received in some way years before, and the bark had grown again on all sides to leave a hiding spot. The hand that was thrust in felt and drew out a small quantity of dead leaves, but it was too low down for safety, and no wild thing had pre-empted it for a nest.

"Why, it might be turned into a post office!" mused the girl.

And instead of writing to her girl chum she wrote: "A maiden who lives near here is waiting for her Sir Knight to come and bear her away." "There!" was half defiantly exclaimed as the note was deposited in the cup.

And instead of writing to her girl chum she wrote: "A maiden who lives near here is waiting for her Sir Knight to come and bear her away." "There!" was half defiantly exclaimed as the note was deposited in the cup.

As Miss Irene got up to wander through the woods a hawk and go home, the squirrel descended a few feet and seemed to call out:

"Silly! Silly! Silly!"

"Of course it is," said the girl in reply, "and I'll come back tomorrow and tear it up. There are no Sir Knights any more."

Next day Miss Irene went back to the old oak and took her note from the post office and read it with a sigh and a blush. Two or three times she started to tear it up, but held her hand and finally restored it to the cup.

And days and weeks and months passed away, and the girl did not return to the old oak tree. She tried to content herself with looking at it from a distance. It was a young girl romance, and she had a right to keep it locked in her breast.

One afternoon the gray squirrel was chattering away as he cut circles around the trunk of the old oak. There was nothing to make him afraid. There was no other gray squirrel in the woods to dispute his right to the tree, as had been decided by battle.

"Chatter! chatter! chatter!"

A young man was passing in an auto.

"Stop a minute," he said to his chauffeur. "By George, that's a fine old tree! And that's the first squirrel I've seen for years. I'd sure like his head for an ornament!"

He had a pistol in his pocket, and he drew it and approached the tree. He was led around it as another had been.

"Hello! Here is the old fellow's nest! I wonder if any of the family is at home."

Very cautiously a hand was inserted. There might be teeth there awaiting it. No, there were only a few acorns and a bit of paper.

"A maiden who lives near here—" The young man walked back to the road and stood looking at Aunt Cynthia's house a long time. Finally he said to the chauffeur:

"We will go back to that house."

And from between the morning glories climbing over the lattice of the veranda Miss Irene peered out and saw him and knew that her Sir Knight had found her appeal and had come to answer it.

Satisfaction in Work.

All thinking men and women get the main satisfactions of life, aside from the domestic joys, out of the productive work they do.—Charles W. Elliot.

DAIRY THE DAIRY

WORST FEE TO GOOD HEALTH

Constipation Is Starting Point of Many Serious Ailments That Affect Dairy Cattle.

(By G. W. BARNES, Live Stock Specialist, Arizona Experiment Station.)

Constipation is one of the worst foes to good health in cows and to the pocketbook of the dairyman. It is the starting point of many serious ailments that affect dairy cattle. It causes the other organs to be overtaxed to throw off the accumulations of waste that should pass through the bowels.

Constipation causes the cow to have fever which makes such a case really more serious. There is also a marked decrease in the milk flow, and often this is the first symptom that the farmer notices. The farmer or attendant should keep his eyes open and so feed as to maintain a normal state of health. The genuine live-stock man will know his individuals so well that he can tell at once if a single animal gets off feed. The best treatment is to remove the cause which gives rise to it. The main cause is usually from feeding too long on nothing but dry bulk foods. Flaxseed or linseed is a good laxative. If constipation has lasted long, repeated small doses of purgatives are better than a single large dose.

The farmer or attendant should keep his eyes open and so feed as to maintain a normal state of health. The genuine live-stock man will know his individuals so well that he can tell at once if a single animal gets off feed. The best treatment is to remove the cause which gives rise to it. The main cause is usually from feeding too long on nothing but dry bulk foods. Flaxseed or linseed is a good laxative. If constipation has lasted long, repeated small doses of purgatives are better than a single large dose.

Constipation causes the cow to have fever which makes such a case really more serious. There is also a marked decrease in the milk flow, and often this is the first symptom that the farmer notices. The farmer or attendant should keep his eyes open and so feed as to maintain a normal state of health. The genuine live-stock man will know his individuals so well that he can tell at once if a single animal gets off feed. The best treatment is to remove the cause which gives rise to it. TO INCREASE TOMATO YIELD

Maine Station Reports Gain of 50 Per
Cent by Practice—Others Re-
port Fruit Rotted.

(By S. M. CLINTON.)

We have never been able to increase
the yield of tomatoes or improve the
quality by trimming, although some
experimenters, among them the Maine
station, assert that trimming is an im-
provement.

The Maine station reports that the
increase in the yield due to trimming
reached as high as 50 per cent and
the gain in weight was very marked.
The plants were started in the field
June 1, headed back July 24, August
8 and September 5. This work should
be done earlier in the milder climates.

At each trimming the leading
branches were shortened about six
inches and most of the side shoots be-
low the first clusters were removed.

The other clusters were shortened
and by training the vines on wires to
run from five to ten feet high, the sun-
light was admitted to all parts of the
plants.

In our own experiments we have
found that when the vines were freely
trimmed the fruit rotted to a con-
siderable extent and did not ripen as
quickly nor as evenly as when the
vines were untrimmed in the same
garden. In fact, three years ago we
trimmed every other hill, training
them on stakes with cross pieces, and
allowed the other vines to go un-
trimmed, held in place only by a single
frame, inclosing the plants on all sides,
about eighteen inches high.

That year we found the ripest and
best fruit on the untrimmed vines,
while that on the trimmed vines
ripened unevenly and showed a de-
cided tendency to rot.

That was a dry season with us, and
it may be that the trimmed vines re-
ceived too much hot sun. Another
thing noticeable was that the flavor
of the tomatoes on the untrimmed
vines was better and the fruit firmer
than that on the trimmed vines.

AUTOMATIC BRAKE ON WAGON

Device Is Applied When Vehicle Starts
to Move Forward Without Draft
From Team Ahead.

Meditative drivers sometimes forget
to put on the brake, or their wagons
may be so loaded that they cannot get
to the brake rod to throw it into place,
says the Farming Business. Here is
shown an automatic brake for wag-

Automatic Wagon Brake.

ons. It was invented by an Alabama
man, and the patent office has recent-
ly granted a patent for it. The brake
is automatically applied when the
wagon starts to move forward without
draft from the team that is hitched,
and when the bottom of the incline is
reached and the forward movement of
the wagon without hitch pull stops,
the brake automatically releases again.
Note the slot in the tongue of the wag-
on where the double-trees are pinned
and the automatic arrangement at
once becomes clear to one studying
the sketch.

IMPORTANCE OF CULTIVATION

When Work in Garden Is to Be Done
By Horse Rows Should Be Long
and Narrow.

An important consideration in plan-
ning the garden is the kind of cultiva-
tion to be given. Horse cultivation
is recommended whenever possible,
and where the work is to be done
mainly by means of horse tools the
garden should be long and narrow
with the rows running the long way.
The garden should have no paths
across the rows, but turning spaces
should be left at the ends. For hand
cultivation the rows can be much
closer together, and may run across
the garden. In the suggested plan,
where the distance between the rows
is less than two feet, hand cultiva-
tion with a wheel hoe is contem-
plated. If a hand cultivator or wheel
hoe is not available, the rows should
be at least two feet apart to give
sufficient space for the horse cultiva-
tor. Straight lines should be fol-
lowed, no matter what method of cul-
ture is used.

HOGS NEED CLEAN QUARTERS

Many Ailments of Animals Due to
Sleeping in Warm Houses, Then
Feeding in Cold Places.

(By WALTER B. LEUTZ.)

Cough among the hogs may be due
to very dusty quarters. With young
hogs it is frequently due to minute
threadlike worms in the bronchial
tubes. A soft, hacking cough is a
very common symptom of hog cholera.

Hogs also have the common form
of bronchitis and pneumonia, just like
other animals, and people.

With hogs, coughs and lung troubles,
aside from cholera are frequently due
to sleeping in warm quarters, possi-
bly piled up, and then going out into cold
places to feed.

Old Lady's Sage Advice.

Knoxville, Tenn. — Mrs. Mamie
Towe, of 102 West Main Street, this
city, says: "If you had seen me be-
fore I began to take Cardui, you
would not think I was the same per-
son. Six doctors failed to do me any
good and my friends thought I would
die. I could hardly get out of bed or
walk a step. At last an old lady ad-
vised me to take Cardui, and now I
can go most anywhere." All ailing
women need Cardui, as a gentle, re-
freshing tonic, especially adapted to
their peculiar ailments. It is a reli-
able, vegetable remedy, successfully
used for over 50 years. You ought
to try it.—Advertisement.

ANNOUNCEMENTS.

The Kentuckian is authorized to
announce

HON. JOHN C. DUFFY,
of Christian county, as a candidate
for the Democratic nomination for
Attorney General, subject to the ac-
tion of the August primary election.

We are authorized to announce

HON. A. O. STANLEY,
a candidate for the Democratic nom-
ination for Governor, subject to the
action of the primary August 7th,
1915.

We are authorized to announce

HON. HENRY M. BOSWORTH
of Fayette County, as a candidate
for the Democratic nomination for
Governor of Kentucky, subject to
the primary election August 1915.

We are authorized to announce

HON. JAMES B. ALLENSWORTH
of Christian county, as a candidate
for the Democratic nomination for
Commonwealth's Attorney, for the
Third Judicial district, composed of
Christian, Calloway, Trigg and Lyon
counties.

We are authorized to announce

HON. DENNY P. SMITH,
of Trigg county, a candidate for re-
election as Commonwealth's Attorney
of the Third Judicial District of
Kentucky, subject to the action of
the Democratic party at the primary
election, Saturday, August 7th, 1915.

We are authorized to announce

CLAUDE R. CLARK
as a candidate for the Republican
nomination for Clerk of the Chris-
tian County Circuit Court. Primary
August 7, 1915.

We are authorized to announce

JUDGE GUS THOMAS
of Graves county as a candidate for
the Democratic nomination for judge
of the Court of Appeals from the
First district, subject to the Demo-
cratic primary election Aug. 7, 1915.

We are authorized to announce

JUDGE J. T. HANBERRY,
of Christian county, as a candidate
for re-election as Judge of the Third
Judicial District of Kentucky, sub-
ject to the action of the Democratic
primary election Aug. 7, 1915.

We are authorized to announce

HON. THOS. S. RHEA
as a candidate for the Democratic
nomination for Auditor of Public
Accounts, subject to the primary
August 7, 1915.

Wanted Information.

Little Margaret was bright and her
proud parents accorded her the priv-
ilege of answering the phone when it
rang. Margaret answered the phone
one day and was asked by the party
at the other end of the wire to call
her big brother Will to the phone.
Margaret knew that Will was sleep-
ing upstairs and she did not wish to
disturb him needlessly, so she asked:
"Is it anything very particu-lar?"

Unusual Offer To Our Readers.

For a limited time, and subject to
withdrawal after 30 days, the well
known publishing house of the J. B.
Lippincott Company, Philadelphia,
founded in 1792, offers to the readers
of this paper a 12 months' subscrip-
tion to "Lippincott's Magazine" and
a year's subscription to the Kentuck-
ian, both for \$3.00. This is the price
of a twelve months' subscription to
"Lippincott's" alone. Additional to
obtaining every issue of this paper
for a year, our readers will receive
in "Lippincott's," 12 great complete
novels by popular authors, 106 short
stories, crisp, entertaining, original
45 timely articles from the pens of
masters, and each month some ex-
cellent poems with the right senti-
ment, and "Walnuts and Wine,"
the most popular humor section in
America. To obtain this extraordinary
offer prompt action is necessary.
Remit to J. B. Lippincott Company,
Washington Square, Phila., Pa.

HOME THAT IS TRULY HOME

the Art of
its Creation is Wholly
Woman, and Really
Life's Best Work.

A home is not merely a house,
an atmosphere; it is a place of
loved associations, where you can
wear old clothes, and think old
thoughts, and hear familiar voices
without bearing them. You can be
happy there, and be comfortably un-
happy, be thoroughly unpleasant
even, and know that those you love
will think no worse of you than they
do already. Luxury cannot make a
home, nor can books, or pictures, or
rugs, or bric-a-brac. A cat, a canary,
two geraniums, a Bible and an old
rocking chair may make one of the
loveliest homes in the world. At the
same time a home is not necessarily
happy because it is the house of pov-
erty, as some would have us believe.
The art of creating home atmo-
sphere is wholly the art of woman,
and she has none more charming.
Mere care will not do it, or mere
neatness and tidiness; indeed those
things sometimes work the other way.
The love of prettiness will not do
it; good cooking will not do it, al-
though it is a mighty help. Even be-
ing gay and merry, and kindly yourself
is not quite enough, although it helps
even more than the cooking. Success
in homemaking, as in everything
else, requires that you shall feel a
real joy in your work. If it is a drag,
if it is an irksome duty, if your mind
is on a thousand outside things that
are not home, you cannot make home
what it should be. Not that the home-
maker should think of nothing else.
That is neither desirable nor possible.
But the woman whose first pleasure
is to create that beautiful thing, home,
will be a precious and permanent in-
fluence not only to her own family,
but to all her household, to all her
guests, to the whole community in
which she lives.—Youth's Companion.

HOW TO COOK VEGETABLES

To Attain Best Results, These Worth-
While Observances Should Be Kept
Strictly in Mind.

1. Use the freshest vegetables that
can be procured.
2. All fresh green vegetables should
be placed in boiling salted water.
3. All dried vegetables, such as
beans, haricots, lentils, etc., should be
placed in lukewarm water.
4. The use of plenty of water in
the cooking of all sorts of cabbage
and sprouts is not only preservative
of color; it is also advantageous in
reducing the disagreeable smell which
cabbage water always has.
5. Never allow vegetables of any
kind to remain soaking in the water in
which they were boiled; drain them at
once when they are cooked.
6. It is waste of money to buy old,
dried vegetables, and a waste of time
to try to cook them.

Jelly Jumbles.

One-half cupful butter, one cupful
sugar, one egg, one-half teaspoonful
soda, one-half cupful sour milk, one-
quarter teaspoonful salt, flour, currant
jelly. Cream the butter, add sugar
gradually, egg well beaten, soda mixed
with milk, salt and flour to make a
soft dough. Chill and shape, using a
round cutter. On the center of one-
half the pieces put currant jelly. Make
these small openings in remaining
halves, using a thimble, and put pieces
together. Press edges slightly and
bake in a rather hot oven, that jum-
bles may keep in good shape.

Vegetable Ragout.

Put one cupful each sliced turnips,
potatoes and carrots into boiling wa-
ter. Cook till tender. Melt two ta-
blespoonfuls of butter in another pan,
stir into it one-half cupful of minced
onion and fry brown. Add two table-
spoonfuls browned flour and gradu-
ally one pint of hot water. When
smooth turn contents of saucepan into
it, season to taste with salt and pep-
per, cook slowly 30 minutes, dish and
serve. Just before sending to table
sprinkle a tablespoonful of minced
parsley over.

Sour Cream Cookies.

One egg beaten light, one heaping
cupful sugar, one-half teaspoonful soda
in one cupful sour cream, one-half cupful
butter, and flavoring, and pastry
flour to roll. Cream butter and sugar,
add egg and the cream and whatever
flavoring you prefer, then flour enough
so you can roll. Moisten top of cookies
with little milk and beaten yolk of egg.
This makes them look nice, but may
be omitted.

Chocolate Caramels.

One-half pound of chocolate, one
cupful of molasses, one-half cupful of
butter, two cupfuls of sugar, one cupful
of milk, one teaspoonful of vanilla.
Boil the chocolate, sugar, molasses,
milk and butter for fifteen or twenty
minutes, then add the vanilla before
taking it from the fire. Pour into but-
tered pans, and when nearly cold cut
into squares.

Old-Fashioned Lemon Pie.

Four lemons, chop the rind fine,
then add the juice of the lemons, one
quart of molasses, one pound raisins,
chopped. Use three crusts, makes three
pies. Bake in an old-fashioned brick
oven, if you can.

Good to Try.

When the oil stove even bakes too
quickly on the bottom, as is generally
the case you can make it bake even-
ly by placing a piece of asbestos the
size of the pan in the bottom of
the oven.

FARM STOCK

GET RID OF DELICATE HORSE

Farmer Should Dispose of Ailing Animal at Once and Save Much Time, Trouble and Expense.

(By J. M. BELL.)
I know of nothing more trouble some on the farm than the "delicate horse." In the first place the ordinary farmer is not a veterinarian in any sense; therefore, when he is unfortunate enough to own a horse that is subject to spells of sickness, he really does not know what to do, and if this same horse is an animal whose value ranges anywhere from \$50 to \$100, the owner is loath to send off for a regular veterinarian and pay him for his visit and prescription, consequently the horse in question is very apt to die. I have had some experience in the past few months with a delicate horse,

Standard Bred at Government Remount Depot.

and this experience may be of value to some reader.

The horse in question was and is a good one in many ways. "City broke" (that is, fearless), when it comes to the many things that are very liable to frighten a horse these days.

Automobiles, steam cars, bicycles and the like do not even interest him. He will meet any of these horse-tormenting affairs with utmost indifference.

When I first purchased him he was low down in flesh and really looked depressed and sad.

Having had about thirty years' experience in the handling of horses and mules of all sorts, I naturally thought that I could take this specimen to my farm and make something of him.

I bought him over three months ago and have fed him on what is considered by good horsemen to be first-class feed. At the present writing I can only say that my experience and the advice of my neighbors are at fault, for the horse still remains poor and apparently out of condition.

He has had two attacks of sickness in the past month and with no excuse so far as the writer can see. First a bad cold that kept him half sick for over two months, then a severe attack of indigestion, which lasted all day and well into the night, and was followed by a severe chill.

I would advise any farmer who is unfortunate enough to own a delicate horse to dispose of him at the earliest opportunity and thus save himself trouble and expense, for the ordinary farmer does not know what to do with an animal that is regularly subject to these spells of sickness, and even if he does know what to do, it does not pay to waste time on such an animal.

Laughter.

An old writer, John Bulwer, in his "Pathomymia" (1649), says: "But true laughter hath both the effects of the intellectual part as the principle upon which the dilatation of the heart and contraction of the countenance ensue, it being not only an affection of the body, but totius conjuncti of the whole man."

Mrs. Powell Almost Dead

Dry Ridge, Ky.—"I could hardly walk across the room," says Mrs. Lydia Powell, of Dry Ridge, "before I tried Cardui. I was so poorly I was almost dead. Now I can walk four miles and do my work with much more ease. I praise Cardui for my wonderful cure." Cardui is successful in benefiting sick women, because it is composed of ingredients, that act specifically on the woman's constitution, relieving headache, backache, irregularity, misery and distress. Only a good medicine could show such continual increase in popularity as Cardui has for the past 50 years. Try Cardui, the woman's tonic.—Advertisement.

Public Morality.

I have not the slightest regard for that statesmanship which is divorced from the morality which we say ought to guide us in our private life, which we gather for a nation as for individuals from the religion we profess. Time, persistent labor, fidelity to the great principles which we hold and believe in, will give us the victory over existing evils.—John Bright.

Fourth of July.

The Fourth of July is not a national holiday. There is no national holiday in this country, not even the day on which we declared our independence. There are several legal holidays, the Fourth of July being among them, but no national holiday.

Encourage Handsome Homes.

In order to encourage the erection of beautiful residences in Paris, the authorities award three gold medals annually to the designers of the most artistic dwellings. The owners of these homes are relieved of half of their annual taxes.

SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine ills it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At drug stores. 50c. large box, or by mail, The Paxton Toilet Co., Boston, Mass.

DAIRY FACTS

ONE COMMON DAIRY MISTAKE

Some Farmers Turn Calf Out With Cow as Matter of Convenience—Effect is Generally Ruinous.

Many farmers who do not own hand cream separators, and several who do, frequently make a mistake in their management, of the cow and calf, where the calf is allowed to suck the cow.

We know of numerous instances in which some farmer, for some reason or other, turned the calf out with the cow. Sometimes this is done as a matter of convenience for a few days; or it may be done where one has so many cows to milk that they cannot be attended to properly. Again, if it is a young heifer's first calf, this is frequently done because she gives such a small quantity of milk that the farmer turns the calf out with her, expecting to take her up as a profitable cow at her next calving.

In any and all of these cases, the effect is generally ruinous. The cow grows accustomed to being with her calf, and if she is separated from it at weaning time, or even during the hour of milking, there is at once a falling off in the milk flow, caused by the change. In fact, such a dairy cow is almost sure to go entirely dry within a very short time after the calf is weaned or absent.

USEFUL LITTLE DAIRY HINTS

Waste of Time and Feed to Breed Scrubs—Provide Supply of Clean Water for the Calf.

Do not waste your time and feed on scrubs, as they take just as much feed and time and do not give as much in return, either in quality or quantity, as the pure-bred stock.

Do not feed calves hot milk.

Do not feed the calf cold milk. It causes scours.

Do not feed the calf sour milk.

Do not forget that the calf needs salt even when he is very young.

Do not forget to keep plenty of clean water for the calf to drink. It is better to warm it in cold weather.

Keep the calf in a clean, dry, warm place.

For warts or rough scaly patches on the calf, rub on a mixture of sulphur and lard twice a day.

For scours give castor oil, then break two or three eggs into a dish and beat them, put them in a bottle and give the calf as a drench, two or three times the first day or two. Also omit the calf's milk and grain for at least one feed, then feed him less than usual the next two or three feeds.

PLAN FOR GOOD VENTILATION

Arrangement Illustrated Shows How Air Can Be Admitted Between Sashes Without Draft.

It is possible to secure very good ventilation in any room in any part of the dairy house or barn by the following device: Take a board about six inches wide and just long enough to

Simple Ventilation.

reach the exact width of the window. Place this board below the lower sash, letting the sash rest upon it as shown in the figure. This arrangement will admit air between the sashes, upper and lower, and there will be no drafts. This suggestion is taken from Farmers' Bulletin 607.

Texture of Butter.

The texture of butter is dependent upon its grain, which is secured by its process of manufacture. Over-churning and too high temperature both injure the texture of butter.

Cow "Holds Up" Milk.

Once a cow is out of sympathy with the milker, the process of elaboration and concentration is retarded, and we are apt to say she "holds up" her milk.

Machinery of Cow.

The machinery of a cow, by means of which she produces milk, is as delicate as that of a watch, and yet we often act as though the contrary were true.

Using Milk Tube.

The regular use of a milking tube will remedy defects of a hard-milking cow, but do not have such a cow and you won't need the tube.

AT THE CHURCHES.

Strangers in the city and the public are cordially invited to all services at the following churches:

Cumberland Presbyterian Church—J. B. Eshman, Pastor. Sunday School at 9:30. Preaching at 11 a. m. Christian Endeavor 6:30. Preaching at 8:00 p. m.

Harry Objected.

Harry, two years old, whose mother is a widow, protests vigorously when she goes out with any of her friends in the evening, as he is left at home with an aunt. One evening recently Harry was left to entertain a caller while his mother was putting on her hat. After a long silence Harry blurted out: "Have you a mamma?" The amazed friend said that he had, whereupon Harry said: "Well, why don't you take your own mamma out, then?"—Chicago Tribune.

Some Difference.

Floyd and Walter had just come home from school. Walter, the youngest, said to Floyd: "We got two dead birds in our room." Floyd replied: "That ain't nothing, we have lots of them. They ain't dead, them's stuffed."

Fort Worth, Tex., compels jitney-men to take out indemnity insurance policies.

KAISER MUST ENDORSE BELGIAN COURT MARTIALS

Change Caused By Execution of Eight Liege Citizens.

Amsterdam, June 17.—Every sentence of death by a court martial in Belgium must hereafter be endorsed by Emperor William before the prisoners are executed, according to a telegram received by the Tyd from its correspondent at Maastricht.

The writer of this says that Emperor William telegraphed these instructions on learning that the eight citizens of Liege had been executed for alleged espionage and that twenty others were in prison charged with same offense.

There was great anxiety as to the probable fate of the twenty until Emperor William's order was posted alongside the list of names of those who had already been shot.

Negro Hero.

John E. Stoner is a one-armed negro, who pushes a boardwalk chair at Atlantic City. He was wheeling a couple of visitors along the walk when he noticed a commotion on the beach. The waves were running high. Far out in the water there was a girl clinging feebly to a pile at the end of a jetty. She and a male friend had been carried into deep water by the undertow. The man, after a hard battle, had brought her as far as the jetty, then he had been flung against a pile and disappeared. The girl was in danger of following at any moment.

Several men had started out to rescue her, but they felt the pull of the current carrying them seaward they gave it up. She was left to her fate.

The moment Stoner observed the situation, he leaped from the boardwalk, and dressed as he was, dashed through the crowd and plunged into the surf. Fighting his way through the breakers with his one arm, flung against the jetty over and over again till he was nearly unconscious, bruised and battered and buried under the waves, he finally reached the drowning girl. She seized him tightly around the neck and pulled him down. But he reappeared, and started for shore with her, swimming with his feet. Half way to land he met a German swimmer with a 'big surf board. The two got the girl onto the board, and soon other men formed a human chain stretching out from the beach, and the girl was saved.

Stoner was taken to the hospital and had his wounds dressed, then he hurried back to his boss and apologized for deserting his chair.—Owensboro Messenger.

Influence.

One cannot know much about any great human being, think what he would do under this or that circumstance, or what he would say if he were here, without coming to be something like him. We are strangely influenced in this world by those whom we admire most. Harriet and I know a little old maid, I have written about her elsewhere, who has thought so much about the Carpenter of Nazareth that she has come to be wonderfully like him.—From "Hemphill," by David Grayson in the American Magazine.

INCOME TAX ESTIMATED AT ABOUT \$82,000,000

Increase of \$2,000,000 From the Previous Figures.

Washington, June 16.—First estimate of the returns from the personal and corporation income tax have been revised upward by the treasury officials, who now anticipate more than \$82,000,000 during the present calendar year from this source.

Estimates made in May promised a return of \$80,035,000.

It is now apparent, officials said today, that there will be sufficient money from this source to wipe out a large part of the deficit which appeared earlier in the year.

Fire and Gas in World War.

The primitive warrior who used poisoned arrows when he did not intend to eat his victim could never have given the modern fighter any lessons in savagery. Poisoned arrows are not being used in the European war, but apparently only for the reason that they are out of date and do not destroy life on a sufficiently large scale to meet the requirements of a twentieth-century war.

"To get satisfactory results the modern science of chemistry has been called into service," says the July number of Popular Mechanics Magazine in an illustrated article. "Poison gases are used, and if the wind is not right for this, liquid fire is thrown into the enemy's trenches. With the conditions favorable, a dense volume of poison gas that follows the ground in a cloud fifteen feet or more in depth is sent down on the wind to the enemy's position."

"Whoever may have been responsible originally for the resort to poison gas, there is little doubt that both the Germans and the allies are now using it. The Germans used it in their recent attack on Hill No. 60, near Ypres, Belgium. In the Argonne forest, in France, each side attacks with gas at every opportunity. According to press reports the gas used by the French does not kill or permanently injure its victims, but renders unconscious for a period of one or two hours. In a recent number of this magazine the new French turpentine bomb was described from information coming from an apparently reliable source. In the light of civilized standards, the best that can be said for turpentine is that it kills instantly. The use of such bombs may explain the reported recent successes of the allies in Flanders. For several weeks London has stood in fear of an attack in which the city might be overwhelmed by gas bombs thrown from Zeppelins. Nor is the use of gas and liquid fire the only lapse from the standards heretofore thought to form an integral part of modern civilization. An American manufacturer has developed a shell which, according to the advertisement, is one of the most deadly ever produced. The principal merit claimed for this shell is that when it explodes the fragments become coated with a poison that makes the slightest scratch fatal—that places the victim practically beyond the aid of medical science, so that he dies in agony within a period of four hours."

"Just what will be the outcome, or the effect on civilization, of such methods of fighting it is impossible to estimate."

Learn To Swim.

Most forceful has it been driven into the minds of Owensboroans recently that every boy should know how to swim. The tragic end of a little fellow, just on the threshold of life, and the near approach to death by drowning at the same time of a middle-aged man, bring nothing but grief to those affected, but they bring their loss to humanity. That lesson is not kept out of the water, but learn to swim. No athletic accomplishment is more useful. The good swimmer has a knowledge that may some time save his own life and that of others. With this in mind the Y. M. C. A. has inaugurated a swimming school for boys. The rapidity with which they learn to keep themselves above water under the supervision of an expert in swimming is remarkable. By this means the safety of the water and of the swimmer is watched.—Owensboro Inquirer.

During the summers of 1912 and 1913 Hopkinsville had a swimming school largely patronized. The draining of the river of course destroyed the swimming pool.

"A Rubber Chain Tread built on a Powerful Modern Tire"

Factory capacity doubled—ample supply of the famous "Chain Treads" now ready, and at the lowest price in their history

Our total factory capacity has been doubled. Now we are ready to supply "Chain Tread" Tires in unlimited quantities at popular prices.

For several years we have built "Chain Tread" Tires for a limited trade, but heretofore we have not been able to produce "Chain Treads" in large quantities.

"Chain Tread" Tires

Safety experts acknowledge our rubber chain tread, built on this powerful modern tire, to be an absolutely marvelous anti-skid device.

We challenge any competitor's tire to show you the same combination of real anti-skid protection and low cost per mile. We challenge you to keep a tire record and prove it for yourself. Send your name and address, for a set of Free Tire Record Blanks.

HOW MEN ORATE IN THEIR HOMES

In the July Woman's Home Companion Mary Heaton Vorse writes a highly interesting and amusing article entitled, "Oratory in the Home," in which she says there is many and many a woman who would love her husband if it were not for his conversation. Of the average husband and his habit of speechifying she writes in part as follows:

"A terrible blight falls over the average male in the bosom of his family. Outside, in the club, he may be a charming talker, and the orator in him who uses symbols for thought temporarily dies. But enter the home, and you find him dealing out sententious comment, instructing, lecturing, striving to mold the joyous and new-minted individualities of his sons and daughters into heaven-knows-what forlorn and conventionalized image of what a boy and girl ought to be. This passion for instructing, by the average husband, is what causes the bird of joy to depart in thousands of homes."

"It is evidently the duty, as well as the policy, of all in the household to listen. Perhaps the first duty of a wife is to take her husband seriously. The wise woman realizes that since her husband probably has come to stay his peculiarities have come with him, and as long as his love for instructing his wife and children continues she had better stifle any desire for flippancy."

"Here is the real reason that people have for saying that women have no sense of humor. As long as the husband is sententious, a sense of humor in the home would be as dangerous as dynamite. There are many young girls who start out well equipped in this respect, but marriage changes all that. Blasphemous laughter, which shows disrespect for a man's opinion, kills his self-respect and his love for his wife, just as one ribald laugh would wilt the floweriest alumni after-dinner speaker."

Rangers Arrest Riders.

Saturday afternoon State Ranger A. C. Stafford, and a deputy brought into this city for safe keeping three white men, who gave their names as Dave Kennedy, O. C. Terrell and Raymond Lancaster. These men are charged with night riding and were arrested in Stewart county. This makes six alleged night riders that have been placed in Montgomery county jail for safe keeping. They will be tried under the K. K. K. statute. Officers are very busy and other arrests are expected to follow.—Clarksville Leaf-Chronicle.

DR. BEAZLEY Specialist (Eye, Ear, Nose and Throat.)

Marriages are contracted very early in Persia.

WOMEN WHO DO NOT MARRY--AND WHY.

There were in the United States in 1910, 8,924,056 women over 15 years of age who were neither married, widowed nor divorced. These single women represent 27.7 per cent. of all the women over 15 years of age in the United States at the time.

Of native-born white women between the ages of 25 and 34, 30.6 per cent. are unmarried, while of the same class between the ages of 34 and 44, 17.8 per cent. are still single.

The public school teachers of American alone number nearly 400,000 mature women, hardly any of whom are married.

It would be foolish to imagine that the great majority of single women in America could not marry if they wanted to do so. Man proposes, but woman dictates when he shall do it. Why do many women elect to walk through life alone?

Doubtless the growth in democratic ideals, which has been steadily working among women since 1870, has had much to do with it. Women have ceased to be merely "the sex"; they have become individuals.—Ex.

Daily Thought.
There are only two roads by which any important goal can be reached—sheer strength and perseverance.—Goethe.

Newfoundland is the oldest British colony.

THE JULY WOMAN'S HOME COMPANION.

In the July Woman's Home Companion two letters are published which the editors say they cannot answer. They ask readers to send in suggestions as to how the questions in these letters should be met. One letter is from a woman who wants to get married and does not know what to do about it. The other is from a man who wants to get married and does not know what to do about it. The difficulties that stand in the way of marriage as outlined in these two letters are very real and probably exist in tens of thousands of cases.

Among the interesting articles in the July issue are: "Oratory in the Home" by Mary Heaton Vorse; "Four Interesting Questions Often Asked About Better Films" by Helen Duey; "Mrs. Larry's Adventures in Thrift" by Anna Steeg Richardson; "The Country Woman's Opportunities" by Frank A. Waugh; "The Camping Caravan" by William J. Albin, and "Made-in-America Vacations" by Albert Lee.

First Christian Church.

"The Open Church" J. Newton Jessup, pastor. Bible School etc. Christian Endeavor 7 p. m. The pastor will preach in the morning on, "Sunday, its economic, intellectual and spiritual value." In the evening on, "The Imperialism of the Gospel."

Settlement of Jewell W. Smith, Sheriff of Christian County, Ky., For The Year 1914.

As made this day with John W. Richards, Commissioner, appointed by the Fiscal Court of Christian County, Kentucky, on the 5th day of January, 1915, to make said Settlement, as appears in words and figures as follows:

How to Fish for Trou t.

In the July Woman's Home Companion appears a practical article on fishing—for the entertainment and instruction of boys. On the subject of trout fi-hing, the author of the article says in part:

"It is an art to cast for trout, for the line must go a long way from you, so the trout doesn't know you are near. It must be most artistically twisted and moved, so that the fly seems to the fish to swim or to crawl upon the surface. That means a light rod. Then the trout, when he catches the thing, darts away, and you have to 'play him' much as we play the bass, only more so. If you can't have but one fly rod, a five-ounce rod nine feet long is about right. If you can have two, have a longer one for fly fishing, and a short, stronger one for bait fishing.

The Simplan railway tunnel is about twelve miles long.

FIGHTING FOR LOVE

**Dora's Bitter Scorn Waked the
Brute in Her Peace-Lov-
ing Suitor.**

By JOHN PHILIP ARTH.

(Copyright, 1915, by the McClure Newspaper Syndicate.)

As a boy among boys, Clyde Drew never engaged in battle. Not that he took to his heels every time there was a chance for a scrap, but that he was not naturally belligerent, and if there was a question at stake he was good at argument.

There were scrappers at college who called him the deacon and let him go his way in peace. He didn't row, box, run, jump, play football, swim or enter into athletics in any way. He had a good figure and more than the average amount of muscle lying dormant, and he also passed a high examination. When young Drew left college he took a clerical position, and all his exercise consisted in walking. Once a friend took hold of his arm and found it as soft as a woman's.

"Gee whiz! where is the muscle?"

"I don't have to handle the crowbar or a sledge here," was the reply.

"But supposing someone picked a fight with you?"

"Why should anyone?"

"You may see some day. Maybe you carry a gun."

"No."

"Well, I'm not going around looking for trouble, but if there is need for scrapping I shall be on hand at the old stand."

The conversation made no impression on Mr. Drew. He could hardly conceive of a situation calling for muscle to get him out of trouble. He would insult no one, and no one would insult him.

Miss Dora Thorn and Mr. Clyde Drew were engaged to be married, and it was a real love match. Mr. Drew had many admirable qualities and had some money and a good salary.

It had been love at first sight, and an engagement followed in a few weeks. Mr. Thorn did not object to the engagement, made without consulting him, but he said to the lovers:

"I think you have been over hasty. You know so little about each other that it's my wish that you should put the marriage off several months. When I was a young man I came very near rushing into a marriage that I should have repented the rest of my days."

"And when the postponement had been agreed to the girl said to her lover:

"Clyde, are you going to look for faults in me from now on?"

"I couldn't find a single one if I looked ever so long," was the lover's like reply.

"That is nice of you. If you have any faults I have not discovered them yet."

Did Miss Dora think it a fault that he was weak of muscles?

Had she ever wondered if he was brave or otherwise?

Had she ever felt the sense of protection when riding or walking with him that a strong man insures?

She knew that he was fair looking and had a good figure, and that filled the bill physically.

The loving couple were out for a spin in the auto one afternoon when, as they reached a narrow part of the highway they encountered a young man in a huggy. He was given more than his share of the road, but he was not satisfied with that. He brought his horse to a halt, and sat scowling for a minute before calling out:

"Hey, you dude, do you know that you are blocking the road."

"There's plenty of room for you to pass," replied Mr. Drew.

"You are a liar and a hog, sir!"

"Why, the man is ugly drunk!" whispered Miss Dora.

She turned to her lover to find him pale-faced and his chin quivering.

Mr. Drew had never expected to be insulted, but here it was, good and hot.

"Are you going to keep me here all day?" snarled the stranger.

"No one is keeping you," was answered, but in a very mild voice.

"I say again, you are a liar!"

Miss Dora knew enough about man nature that when the lie was passed it meant a knockdown, and she trembled over the answer that would be forthcoming, but there was no answer.

Mr. Drew was as white as a ghost and trembling like a reed. "Was it with anger, or was he holding back on her account?"

"Not only a liar, but a coward as well," added the young man.

No answer—no movement.

The buggy was driven up beside the auto, and the driver's whip laid over the shoulder of a cowering man three or four times. Then the whipper said to Miss Dora:

"You can see what sort of a cur he is. If you marry him, I wish you joy!"

Then he drove on, and after the auto had proceeded a few rods it was turned about and headed for home.

Not a word from Mr. Drew. Not a word from Miss Dora.

But what was there to be said? Mr. Drew had played the part of a coward so abjectly that nothing he could say would excuse him. He had been called a liar and a coward. He had been horsewhipped and had cringed over it. He had let the girl be insulted. She was sorry for him in a way, and also knew bitter scorn. She was engaged to a coward, but would she ever marry him?

It were better to have a drunkard and a wife-beater for a husband.

They drove to her father's house and parted without a word. They both knew it was the end. It was not until he reached the privacy of his room that Mr. Drew awoke from his stupor. Then he, who had scarcely ever used an oath, fell to cursing. He called himself names. He longed for someone to kick him.

"I am a coward—a poltroon—a thing!" he shouted at himself. "I have debase myself until men ought to kick me out of their company. If I had a pistol here I wouldn't wait a minute before shooting myself."

By and by the young man grew a bit calmer, and he sat down and asked himself: "Why did I act the craven? Was I afraid of the man? Even a coward would have put up a fight under the circumstances. There's something wrong with me, and I am going to find out what it is."

He went down on the street and called in at the first doctor's office he came to. Fortunately for him, the doctor had studied something besides illness. He let the young man tell his story without interruption, but listened very closely.

"I have seen several cases like yours. You should have fought when a boy, to give you confidence in yourself as a man. Your muscles are not as well developed as a woman cook's. You have been a peaceful young man. You have thought peace alone. You have not exercised your arms. You have never swung the clubs nor had the boxing gloves on. You have gone through life thus far thinking the time could never come when you would be insulted and have to resent it or run. Because you were peace-minded, you argued that all others were the same. Am I not right?"

"You are a doctor."

"Well, in the first place, you were taken by surprise. You saw and heard what was taking place, but you could not credit it because it had never happened before, and it happened now without cause or warning. When the time came to use your muscle you didn't have it with you, and that gave you a helpless feeling. Young man, you are not a natural coward, but you have been a very foolish person. Go and see the boxing master of a club."

"And learn to fight?" asked Mr. Drew.

"Learn that a man who goes only to hunt with an unloaded gun is an idiot. You may never be called upon to fight, but if you are then you want to lick the other fellow."

Mr. Drew left the doctor's office for a club, and that evening took his first lesson at punching the bag. In time he put on the gloves with the instructor and others, and in time again was called a fair boxer.

"But this doesn't prove that you have grit," said his master. "I want you to put on the gloves with a slambang and give him a licking. He has been guying you ever since you began. He says you are a milk-and-water sissy, and that a boy ten years old can make you quit."

For almost the first time in his life young Drew flew mad and wanted to hit someone. He soon had his chance. He was knocked down the first thing, but he got up and put up such a fight that his opponent took off his gloves.

Meanwhile, he had employed a detective to find out all about the man who caused his downfall. He lived about three miles from the spot where he had been encountered and drove into the town regularly every Saturday afternoon. Not a word or line through the long weeks, but he did not hope nor expect. How could he? He must first rehabilitate himself in her esteem.

One day an auto approached the Thorn residence from the north, and a buggy from the south. Miss Dorcas sat on the veranda. The two vehicles met in front of the house and the girls saw and heard all that followed.

"Hello, here is the liar and coward again!" sneered the driver of the buggy.

Mr. Drew moved his auto out of the road and got down.

"This time he is going to run away!"

Drew removed his hat and vest and rolled up his shirt sleeves.

"Maybe he's going to pick daisies." "He is going to lick you, you loafer. If you dare come down here!"

The next moment they were at it, and in her excitement the girl stood up to see. It took her lover just ten minutes to give the fellow the best licking of his life and as the victor was about to leave her one and a half minutes later she laid out the other.

Miss Dorcas said: "I saw it all. Oh, and I am proud of you! Father said you would do it some day. Come in and let me dress your hurts."

New Asphalt Bed Discovered.

An asphalt bed which seems to be practically inexhaustible is now being developed commercially in Leyte province in the Philippine Islands. The bed lies near the shore line at Tacloban, at which port ships can anchor and take on cargo of the asphalt from lighters loaded at the mines, with practically no overland transportation. The deposits also contain oil of a high grade. The asphalt is almost pure near the surface, and is exceptionally pure at greater depths. The oil deposits—evidenced by oil flowing with water from a spring—contain oil pure enough to be used by the natives for illuminating purposes.

For Ivy Poisoning.

One of the best remedies for ivy poisoning is to rub the afflicted part

PURELY PERSONAL

Mr. Paul Twyman, of Hopkinsville, has arrived in Bowling Green to join his wife and little daughter, Louise, who are visiting Mrs. Twyman's parents, Mr. and Mrs. R. B. Hughes, at their home on Thirteenth Street.—Bowling Green Messenger.

Mr. W. C. Hendrick, of Trigg county, was in the city Thursday on business.

Dr. and Mrs. T. W. Blakey and daughter, Miss Sallie George, and son Churchill, left Thursday night for California, where they will spend a part of the summer.

Roy J. Cary and Mrs. Cary have returned from a visit of a week to relatives at Greenville.

Miss Alice Coleman, of Gracey, is the guests of Mrs. Lander Meacham.

Misses Hattie, Jennie and Sadie Horn, of Evansville, Ind., are visiting Mesdames Max Sabel and Sam Cristal.

Barney Mashburn, a young man of this county, went to Hopkinsville Tuesday afternoon to accept a position as attendant at the Western Kentucky Hospital. * * * Miss Ivy Mitchell returned to her home in Hopkinsville Wednesday after a visit of several weeks here to Hon. Max M. Hanbery and Mrs. Hanbery. * * * Messrs. E. C. Thacker, J. D. McGowan and Hubert Ficken, of Hopkinsville, came down Wednesday afternoon to be present at the "Kool-less and Kollarless" barbecue.—Cadiz Record.

Miss Grace Sallee is visiting friends in Princeton, Ky.

Misses Elizabeth and Sadie Nourse are spending a few days in Louisville.

Lawrence Hord and bride, of Memphis, arrived last night for a visit to Mr. Hord's mother, Mrs. J. G. Hord.

Rev. F. A. Mitchell, of Shepherdsville, Ky., is spending his vacation with his son, W. L. Mitchell, of this city. He is one of the best known ministers of the Methodist church in Kentucky.

Miss Mary Baynham has returned from Bowling Green Normal School, where she took a domestic science course. She will continue her studies at Boston, July 1.

Mrs. V. E. Watson is visiting at Albion, Ill.

Mrs. Lillie Waller Chatten, of Chicago, is here on a visit to her relatives, after a tour of Kentucky giving readings from her poems.

Mrs. A. P. Crockett, of Oklahoma City, is visiting her father, Mr. J. D. Russell, Sr.

Mrs. James West and son, William, are at Dawson.

Mrs. T. P. Johnson left today to visit friends in Atlanta, Ga. She will be absent several weeks.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out all obligations made by him.

NATIONAL BANK OF COMMERCE, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

Society

Mrs. Gary To Entertain.

The following invitations were issued Thursday afternoon:

Mrs. George Edward Gary At Home Tuesday, June the twenty-second Nineteen hundred and fifteen 4:30 to 6:00

Mrs. Arthur Blythe Anderson Bridge Club.

Miss Lillie Belle Phelps entertained the Thursday afternoon bridge club this week. Miss Bessie Grimes won the guests' prize and Mrs. Jim Hooser won the club prize. Delightful refreshments were served.

"As You Like It" Club.

Mrs. Howell Tandy entertained the "As You Like It" club yesterday morning at ten o'clock. "42" was played. Delightful refreshments were served.

Miss Radford Entertained.

Miss Alice Radford entertained the young ladies' bridge club Thursday morning at ten o'clock. Miss Ethel Gunn won the prize. Refreshments were served.

Mrs. German Honoree.

Mrs. Edgar Wyatt entertained Wednesday morning at 10 o'clock at a few tables of bridge and "42" in honor of her guest Mrs. Dan German, of Franklin, Tenn. The refreshments consisted of a salad course.

SHY ON MOTIVE POWER.

"Our new office boy isn't very energetic, is he?"

"No. About all he can do successfully is to drop letters down the chute."

THEY DIFFER.

Helen—When I grow up and get married I'm going to have a lot of children.

Mary—I'm not; I'm going to marry a bachelor.—Judge.

HE OR NONE.

"Did Maud Wellalong marry the man of her choice?"

"Well, I heard it was a case of Hobson's choice."

ONE REASON.

"Why is the moon supposed to be such a foolish luminary?"

"Because she puts off getting full until she's down to her last quarter."

CONSTANT SUPPLY.

"Don't you think it is a fine thing always to have hot water in the house?"

"Not if you're always in it."

AT THE SEASHORE.

"Are you going to wear your new bathing suit today, Mayne?"

"No, indeed; it looks too much like rain."

ITS NATURE.

"Who is expected to win at a tea fight?"

"How can anybody win when it's a drawn battle?"

Mount Mitchell, in North Carolina is the highest peak in the United States east of the Rockies.

"CURLEW BUG" IS A WIDESPREAD PEST

"Curlew Bug." A—Corn Plant Attacked by Adult Insect. B—Egg as Placed in Stem of Young Corn Plant, Enlarging at Left. C—Pupa and Adult in Root of Corn, in Chamber Eaten Out by the Larva.

(Prepared by the United States Department of Agriculture.)

Rotation or stercoration of crops is a simple and efficient method of getting rid of the "curlew bug," a widespread pest in corn and rice fields. "Don't plant corn after corn or rice, or rice after corn" is a useful maxim to remember in localities infested by the bug.

The curlew bug, which is one of the so-called "snout beetles" or curculionids, about half an inch long, is particularly fond of swamps and marshes where it feeds on large-stemmed grasses and sedges. Of cultivated crops, corn and rice most closely resemble its natural food and in consequence the bug is a menace to these crops in almost every state in the South and in large sections of the middle West and Southwest as well. It cannot live on the small grains or on such plants as cotton or cowpeas. In consequence if infested fields are planted to oats, rye, barley, cotton or cowpeas, the curlew bug disappears at once.

In practice, cotton, cowpeas, or winter oats will probably be the best crops to use for this purpose in the South. In Ohio, Indiana, Illinois, Missouri, southern Wisconsin and Arkansas, oats, rye, barley or cowpeas. After a year or one of these crops, the field can be planted again to corn. If the pest returns, a similar alternation should be resorted to once more.

The curlew bug will remain in an infested cornfield throughout the winter and, if the field is planted to corn again, come out in the spring to feed upon the young corn plants. By means of its long snout, at the end of which are situated the mouth and jaws, the beetle punctures the stem of the plant and thus either secures its food or deposits its eggs. Usually the puncture is made a little below the surface of the ground and extends into the crown of the plant. If the puncture is made just above the root, the plant will throw up a number of "tilters" and "suckers," while the main stem itself will be without ears and stalky in appearance. In this respect the work of the curlew bug produces somewhat the same effect as that of the Hessian fly on a young wheat plant in the fall. If the puncture is made higher up on the stem, food is obtained from the folded leaves above the crown. When these leaves finally push forth, the effect of the puncture made by the beetle's snout is revealed by rows of holes across the leaves. Frequently there will also be a distorted growth on the stem.

While the damage done by the beetles in feeding or laying their eggs is in many cases doubtless severe—if the corn plants are very young at the time of attack they are probably destroyed in this way—generally speaking the greatest damage is caused by the larvae hatching from the eggs, especially in the East. The grubs of this insect apparently can live without difficulty for a considerable length of time in the stems of plants that are completely covered by water.

With these insects in full possession of a field, there does not appear to be any thoroughly practical and effective measure for preventing or overcoming their ravages, which frequently result in a total loss of the crop. While throwing up the soil or hilling up the young plants with the cultivator might prevent the beetles themselves from puncturing the stems low enough down to cause the plants to sucker or become distorted, this is by no means assured. We only know that the higher up the insect punctures the stem the more likely is the attack to result only in the transverse rows of holes across the leaves. In any case this rigging or hilling up would only form a slight protection against the injurious effects of the feeding of the beetles. Once the larvae have started to burrow their way downward in the stem there is no way whereby they can be reached by any measure likely to seriously affect them.

Helps for Peach Growers to Control Insect Pests.

After a grower has pruned intelligently, tilled and fertilized his orchard well, and irrigated it if that has been required, the orchard may be short lived and the crops financial failures if he neglects to give proper attention to the control of the insects and diseases which usually occur in his region. While it is true that there are some rather serious peach parasites

which are regional in their occurrence and some of those which are widely disseminated remain unknown thus far in certain districts, it is likewise true that a considerable number of both insect pests and fungous diseases are to be found pretty nearly everywhere in the country in which peaches are grown.

Every fruit grower should be in close touch with the agricultural experiment station in his state, so that he can refer emergency matters there without delay. Not infrequently, the securing of information regarding the control of some insect pest that has become suddenly threatening or concerning the most effective means of checking the spread of a disease hitherto unknown results in saving what would otherwise be a serious loss.

Inquiries relating to any phase of fruit growing may also be referred at any time to the United States department of agriculture, where without cost, through the department's pathological, entomological, and other experts, as full information relative to the problems as can be given may be secured. The department's farmers' bulletin (No. 440) entitled, "Spraying Peaches for the Control of Brown Rot, Scab, and Curculio," will be sent to anyone requesting it. So also will farmers' bulletin (No. 632) entitled, "Growing Peaches," which treats in detail of pruning, renewal of tops, thinning, interplanted crops, and special practices.

CALF DURING FIRST SUMMER

Most Important Period of Animal's Life With Respect to Its Growth—Use Clean Milk Pails.

(By R. M. WASHBURN, Minnesota Experiment Station.)

The first year of a calf's life is the most important with respect to its growth. Unless animals are kept growing during this period their final development will be much retarded, and the chances are they never will reach the scale which their inheritance would give them.

On the best regulated dairy farms calves are born in the autumn and early winter, and they should receive skim milk in moderate quantities through much or all of the summer following birth. On farms having hand separators there is no difficulty in providing the sweet milk for calves, morning and evening; but farmers who patronize whole-milk creameries or who still skim by hand should remember that after the first few weeks milk for calves should either be thoroughly sweet or fully sour, that the most dangerous condition is the half-sour stage. If milk is fed to calves when it is in this changing condition it is almost certain to cause indigestion. It should not be half-sour, nor sour one day and sweet the next, but always one or the other.

Clean feeding pails must be used, otherwise the germs of fermentation and diarrhea will be brought to the infant cow from the slime of the dirty drinking dish, and with young calves it is important that the temperature at which the milk is fed be nearly that of the body. Older animals may receive milk of the temperature of the milk-holding tank.

While it is very important that heifers should have free access to pasture during the second summer, to develop strong bodies, the calf need not have pasture the first summer. In fact, for calves born after the first of the year, pasturing may be a disadvantage. Most young calves in this country are better off chewing tender hay in the quiet and half-dark stable than fighting flies, panting from the heat and cropping tough grass in the pasture.

Pleasure and Profit.

There are many localities where orchards exist but where fruit production is not equal to the home consumption. Farmers owe it to themselves to change this condition and make their orchards a source of pleasure and profit. A little intelligent care will enable them to do so.

Best of Greens.

Young turnip collage and turnip rape are the best of greens. It is a small job to plant these at the right times, and they can be had a summer.

WHOLESALE AND RETAIL GROCERS.

Green-Johnston.

At Oklahoma City last Sunday Miss Margaret Adeline Johnston, daughter of Mr. and Mrs. Will Johnston, and Mr. S. Hathaway Green, of Dallas, Texas, were quietly married at the home of the bride's parents. Dr. Phil C. Baird, of the First Presbyterian church, performed the ceremony. Mr. and Mrs. Green will go to Dallas next week where they will make their home for the present with Mr. and Mrs. J. M. Scott, at 4331 Swiss avenue. Mr. Green is the son of Mr. and Mrs. J. M. Green, formerly of this city.

Liabilities \$200,000.

Louisville, Ky., June 18.—According to schedules filed in the United States district court Charles T. Dearing, bankrupt bookseller, has assets amounting to \$143,179.03 and liabilities of \$189,104.61. The assets of the Dearing Book Shoppe, an allied corporation involved in the bankruptcy proceedings, are listed at \$40,975.23, with liabilities of \$20,647.10.

Peat Bogs.

Peat is a vegetable formation, sometimes of a spongy character (when recent), and again of a kind approximating in composition to wood, while in some instances, at the bottom of bogs, it approaches lignite and even coal.

Gingham is so-called because it was originally manufactured at Guingamp, in Brittany.

Trusts Seem Safe.

Washington, June 15.—Department of Justice officials are considering, what if any steps they will take in view of the refusal of the supreme court to review the action of appeals in reversing the conviction of National Cash Register officials of violations of the Sherman law. Department officials regarded the case as the strongest that could be brought under the criminal section of the anti-trust law and failure to obtain a favorable decision was accepted as meaning that criminal prosecution under the law would almost surely fail.

Another Mule Tragedy.

Noah James, 46 years old, a colored man, working on the farm of W. C. Shropshire, near Lexington, was dragged several hundred yards by a team of runaway mules and received injuries which caused his death three hours later. James fell from the top of the wagon and caught his foot in the trace chains.

Washed Mouth With Soap.

An Indiana man is being sued for divorce because he washed out his wife's mouth with strong soap after she had cursed him. We are not enlightened as to whether the lady objected to the cleanliness imparted by the washing or the brand of soap used in the performance.—Bowling Green Messenger.

TRY MEAT SCRAPS

If your Young Chickens are not growing off nicely. Feed Meat Scraps in addition to grain for eggs as well as growth. PHONE 217.

Fleischmann's Yeast

FREE! - - - - - FREE!

To all Housekeepers TO DAY. One of Hopkinsville's good housewives recently heard of Fleischmann's Yeast and gave it a trial—delighted—only began to express what she thinks of it. ACCEPT ONE CAKE, WITH OUR COMPLIMENTS. Try the following recipe, it will give splendid results.

WHITE BREAD

(FOR USE OVER NIGHT)

1 cake FLEISCHMANN'S YEAST

2 quarts water 2 tablespoonfuls lard or butter, melted,
6 quarts sifted flour, 2 tablespoonfuls sugar,
2 tablespoonfuls salt.

Dissolve yeast and sugar in the water, which should be lukewarm in winter and cool in summer; add two tablespoonfuls lard or butter, and half the flour. Beat until smooth, then add balance of the flour, or enough to make moderately firm dough, and lastly the salt. Knead until smooth and elastic. Place in well-greased bowl and cover. Set aside to rise over night, or about nine hours. In the morning mould into loaves. Fill well-greased pans half full, cover and let rise until light, or until loaves have doubled in bulk, which will be in about one and one-half hours. Bake forty to fifty minutes. This will make six large loaves.

We give Premium Store Tickets with cash sales.

W. T. Cooper & Co.
